|--|--|
| Who does the problem affect? | Most persons with coronary heart disease who pass away are 60 years of age or older. Although both sexes can get heart attacks in old age, women have a higher mortality rate. |
| What are the boundaries of the problem? | Risk for heart disease can be increased by a number of medical issues, lifestyle, age, and family history. |

| | |
|-------------------------------------|--|
| <p>What's the issue?</p> | <p>When a person is affected by heart disease, it causes side effects. Chest pain, chest tightness, chest pressure and chest discomfort Breathing difficulties, Neck, jaw, throat, upper abdomen, or back pain.</p> |
| <p>When the issue occur?</p> | <p>Heart disease - and the conditions that lead to it - can happen at any age. High rates of obesity and high blood pressure among younger people (ages 35–64) are putting them at risk for heart disease earlier in life.</p> |
