Date	12 November 2022
Team ID	PNT2022TMID05795
Project Name	Project - Visualizing and Predicting Heart Diseases with an Interactive Dash Board
Maximum Marks	2 Marks

Solution Architecture:

1)Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions.

2)Its goals are to:
● Find the best tech solution to solve existing business problems.
● Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders
